SUBJ: 18" Pillar Kit for the 24" x 24" QuickSilver Platform

Fairbanks Scales recognizes the need for additional pillars for the 24" X 24" QuickSilver platforms. We have added an 18" Pillar Kit for the 24" X 24" QS Platforms. This 18" Pillar Kit is available as a standard product for both the QuickSilver style (QuickSilver, QuickSilver IS, and the FB2200SS) instruments and the Alternate instruments (FB350, 2300, 5200A, and the 3052).

This brings even more flexibility to the QuickSilver Bench Scale products, allowing our customer the freedom to order what they want. Many of our competitors maintain the philosophy that their customers will order what they have; product flexibility is not an option.

The new Pillar Kits are ordered, installed, and shipped the same as the existing Pillar Kits.

If you require a lower height Pillar Kit for the 24" X 24" platform or a taller Pillar Kit for a dimensional smaller platform, contact the Solutions Group in St. Johnsbury at 1-800-777-9959.

If you have any questions or concerns feel free to e-mail me at terry.m.clark@fancor.com or call me at 816-448-4247.
