SUBJ: FB2550 Enhancements

Fairbanks continues to develop the FB2550 instrument product line. This memo will provide an overview of some of the new enhancements which are included in all FB2550 shipping today.

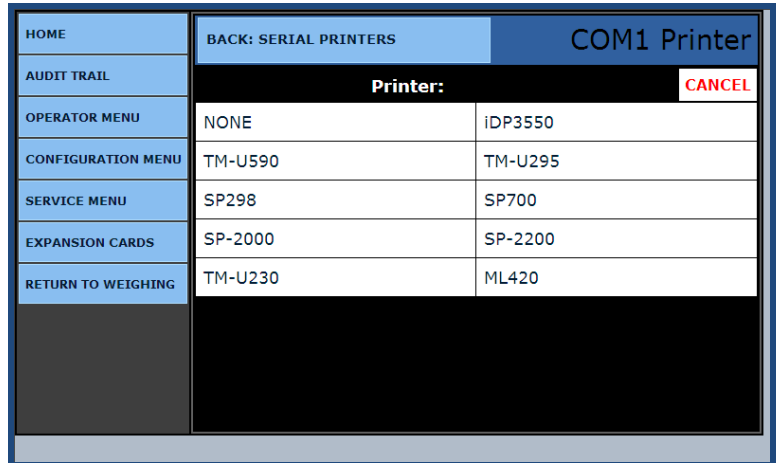

Please review the following two pages for information about these updates. As always, if you have any questions, concerns, or comments feel free to give me a call at 816-448-4249 or by e-mail to dmashaney@fairbanks.com

Additional Serial Printer Options

The FB2550 now includes:

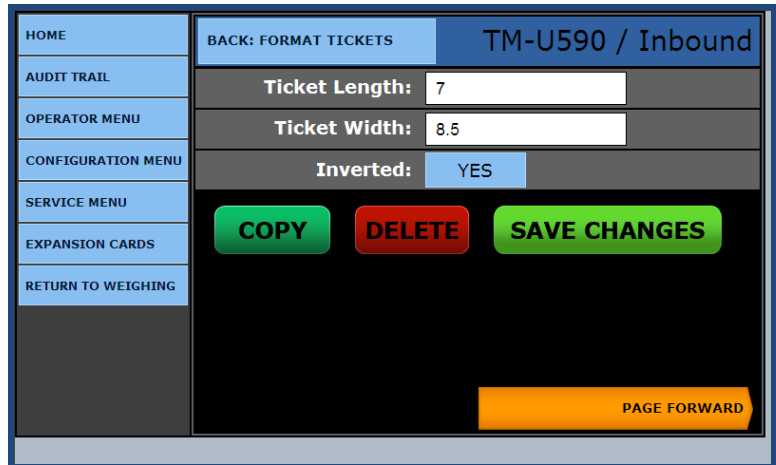

- SP2000 ticket printer
- SP2200 ticket printer
- TM-U230 tape printer
- SP298 tape printer
- SP700 tape printer

Inverted Printing Option

The FB2550 now includes the ability to invert the print when printing tickets when using serial ticket printers.

This feature allows for the customer's existing ticket stock to be used as well as the ability to use wider tickets (left-to-right measurement).

Additional vehicle images

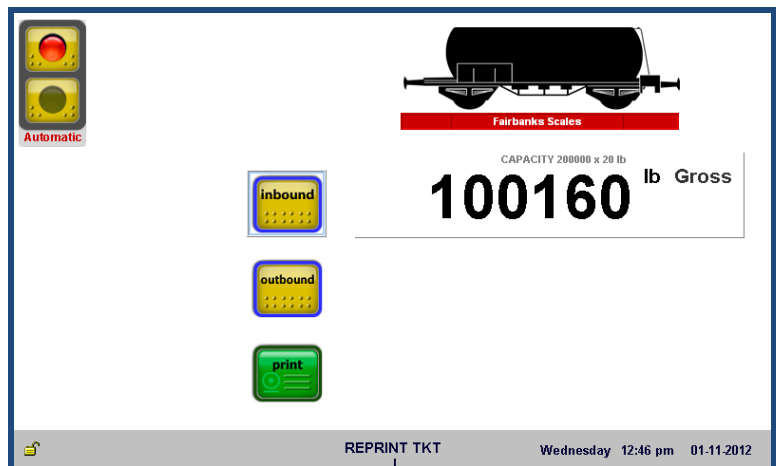

The available images in the vehicle library now include rail cars.

The FB2550 now includes:

- Box car images
- Coal car images
- Flat car images
- Grain car images
- Lumber car images
- Tanker car images

Each image is available in:

- Black
- Blue
- Brown
- Green
- Gray
- Orange
- Purple
- Red
- Yellow

“No Vehicle image” option

Not every FB2550 instrument application will be weighing vehicles. For those tank, hopper, floor scale, and other non-vehicle applications the FB2550 now offers a “no image” option.

When this is selected the FB2550 weigh screen will simply not display any vehicle image, providing a generic weigh screen.
