SUBJ: FB2550 revision 5.1 software release

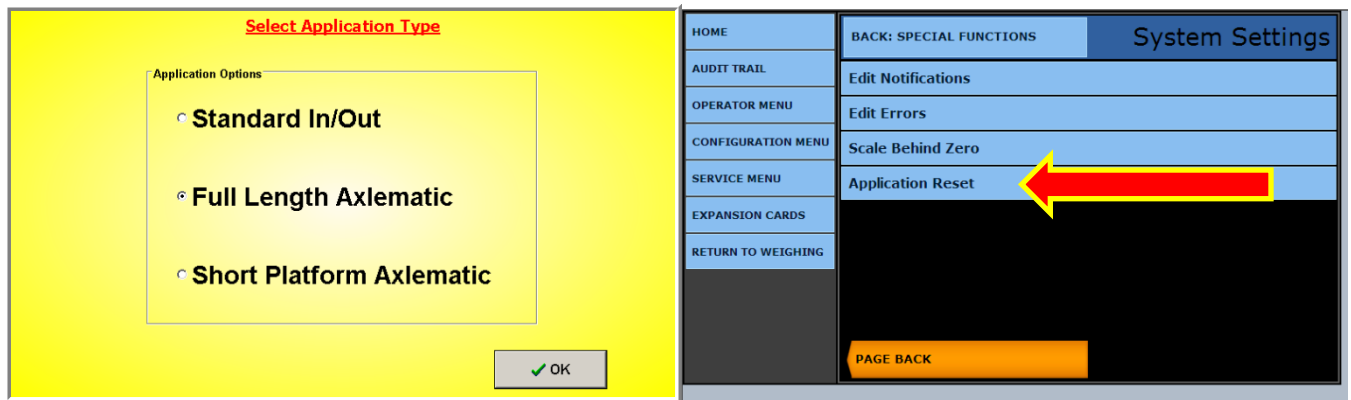

Fairbanks is pleased to announce the availability of revision 5.1 software for the FB2550 instruments.

Rev 5.1 has two new functions:

1. Added the ability to restore an FB2550 revision 4.3 backup to revision 5.1 software.

The process is very easy:

- a. Backup your rev 4.3 FB2550 to your USB jump drive as normal.
 - b. Rename the backup from:
fb2550_ **backup** _xxxxxxxxxxxxxxxx.sql
to:
fb2550_ **upgrade** _xxxxxxxxxxxxxxxx.sql
 - c. Insert your USB jump drive into the FB2550 with rev 5.1 and restore as normal.
2. A new menu selection, APPLICATION RESET has been added, to reset the selected application type. The reset function is located in the SERVICE MENU under SPECIAL FUNCTIONS/SYSTEM SETTINGS. This will allow you to quickly and easily change the application if the incorrect application was chosen during initial FB2550 startup.

Revision 5.1 software began shipping March 2, 2015.
All FB2550s are now shipping with revision 5.1 software.

If you have any questions, concerns, or comments feel free to give me a call at 816-448-4222 or by e-mail to dcoulson@fairbanks.com
